

Enif Guide

Diane Larin
INRO Consultants

Contents of presentation

- What it is
- Lessons
- How to use it
- Availability
- On-line demonstration

What it is

- Beginner's guide
- Format
 - Organized as a tutorial
 - 10 lessons divided into precise tasks
 - Each lesson ends with references to Enif on-line documentation
 - Several concepts and tips in the margin
 - Screenshots and other graphics

Lessons

- 1: Getting started with Enif
- 2: Producing simple network plots
- 3: Printing and exporting graphic output from Enif
- 4: Plotting transit lines and attributes
- 5: Plotting matrices and zonal data
- 6: Plotting auto assignment results
- 7: Customizing a plot
- 8: Using external data sources
- 9: Using lists
- 10: Customizing an application

How to use it

- Special initialization file

```
enif -i %ENIFPATH%\genconf\guide.ini
```

- Similar to `genconf\enif.ini` plus folders for each lesson
- Tasks refer to general configurations
- On-line version (PDF) of the guide under *Help* menu

Availability

- With the next release of Enif
- Distribution file
 - PDF version in the `doc` directory
 - `guide.ini` in the `genconf` directory
- Printed version
 - Will be sent to all organizations with a Software Support Agreement
