ABSTRACT

This presentation details several utilities to assist EMME/2 users in network development and matrix manipulation work.

Network utilities to be presented include a utility to create an annotation of a base network, a node query utility to determine available node number ranges and a utility to re-number existing node numbers in a base network.

Utilities that can assist users in manipulating matrices include a matrix number substitution utility, a matrix output utility and a utility to create zone ensembles.

Submitted for presentation at the 11th Annual International EMME/2 Users' Group Conference, Toronto, Canada (October 23-25, 1996)

MATRIX UTILITIES
=====

1. Substitute MF Matrix Number
2. Export Matrix
3. Create Zone Aggregation Table
4. Return to main menu.
